Camden Sash

Sliding-Sash Windows

Camden Sash

sliding-sash windows

Welcome...

Camden vertical sliding sash windows are a superb quality, multi-functional, visually stunning range manufactured exclusively by the **Camden Group**.

The Camden sliding sash window combines the elegance of traditional sash windows with the benefits of modern PVC materials.

Camden Sash windows will be a lasting feature to your home for many years.

“Add value and character to your home with Camden Sash...”

“The Camden vertical sliding sash window combines traditional benefits with modern elegance... ensuring a stylish yet practical addition to your home...”

Camden Sash...

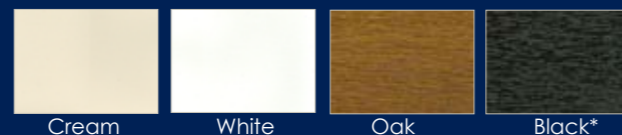

Manufactured from PVCu, Camden's vertical sliding sash windows are strong, will not rot or require repainting; this ensures that they retain their colour and shape throughout the years with the minimum of maintenance.

The Camden Sash window is ideal for replacing existing timber sliders in period buildings, whilst at the same time providing character and traditional elegance in all new-build houses.

Features...

- ✓ The Camden vertical sliding sash window is available in **white, cream, oak** and new to the range, **black**.* To match, window furniture is offered in white, chrome and brass.
- ✓ If you require a more period-style look, there are extra options of **Astrical Bar** or **Georgian Bar**. Decorative sash horn options are also an elegant addition.
- ✓ The vertical sliding sash window can be manufactured to your size requirements, and to give you extra choice, can be manufactured with an arched head.
- ✓ Camden Sash windows ensure low maintenance, as unlike timber sliders, PVC will not rot or require repainting, and due to the tilt facility, can be easily cleaned.

Colour Range:

*Black available from 2009

Technical Details...

Sliding Sash...

The top and bottom sash on the window both feature the vertical sliding sash facility for both convenience and safety.

Tilt Facility...

Both sashes tilt inwards into the room to provide extra ventilation options and this also allows for easy maintenance.

Safety...

To ensure safety within the family home, there is the option of a child restrictor hinge for both tilting sashes, keeping your family safe and secure.

Security...

The vertical sliding sash window is internally glazed ensuring it is one of Camden's most secure frames. For extra security customers may also choose an additional high security lock.

Gaskets...

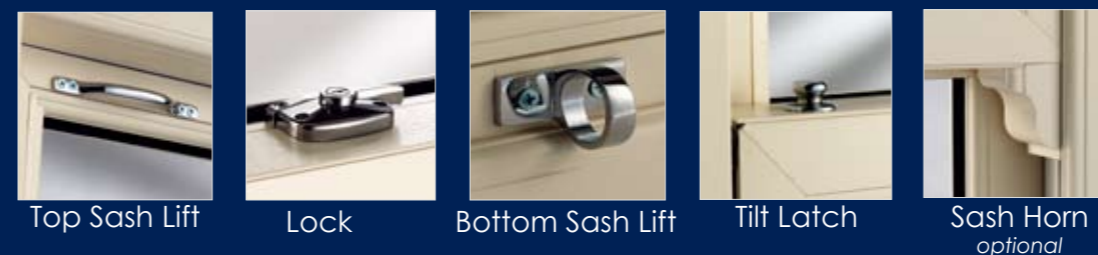

The gaskets within the vertical sliding sashes sits flush within the frame which means that only a fraction of the gasket is visible. The result is that the appearance of the window is not distorted by thick, bulky lines.

Double Glazed...

Vertical sliding sash windows are fitted with double glazed units as standard.

Furniture...

The following window furniture ensures the easy-to-use application of your vertical sliding sash window:

Energy Efficiency...

Energy waste is big news! The government is committed to reducing CO2 emissions by 20% by 2010. **Camden eCare**, Camden's range of energy efficient windows, has been designed specifically with this in mind...

✓ Camden eCare Energy Rated window range stops heat from inside the home escaping, while allowing heat from the sun into the room: the result is savings on fuel bills and reduced energy waste.

✓ **The Vertical Sliding Sash Window offers greater thermal efficiency than timber sash windows, and has been awarded a C Rating by the BFRC.**

✓ All products in the Camden eCare Energy Rated range have been designed to deliver the highest levels of energy efficiency while retaining maximum weather and security performance.

✓ All Camden eCare Energy Rated windows are fitted with warm edge Super Spacer as standard, helping to reduce heat loss, condensation build up and energy emissions.

Energy Saving Recommended...

Camden eCare Energy Rated windows have been awarded official recommendation by the Energy Saving Trust.

The Energy Saving Trust promotes the efficient use of energy specifically within the home.

So when you see the Energy Saving logo, you can be assured you windows are energy efficient!
